

50 Supplements 4 Critical 10 High 11 Moderate 3 Synergistic

COMPLETE SUPPLEMENT INVENTORY

OTC Medications		
SUPPLEMENT	DOSE	NOTES
Advil (Ibuprofen)	1,800 mg	Near max OTC dose. Major bleeding & GI concern.
Fat-Soluble Vitamins		
SUPPLEMENT	DOSE	NOTES
Vitamin D3	100,000 IU	25× weekly bolus. Hypercalcemia risk.
Vitamin K2 (MK-7)	8,500 mcg	Very high. Directs D3-mobilized calcium to bones.
Minerals		
SUPPLEMENT	DOSE	NOTES
Zinc Picolinate	100 mg	~126 mg total (4 sources). 3× upper limit.
Magnesium L-Threonate	2,000 mg	Brain-penetrating. ~144 mg elemental.
Magnesium Glycinate	350 mg	~50 mg elemental. ~224 mg total from 5 sources.
Copper Bisglycinate	2 mg	~3.65 mg total (3 sources). Insufficient vs zinc.
Potassium	1,020 mg	Counteracted by licorice root.
Boron	25 mg	Above UL (20 mg). ~26.2 mg total.
Iodine	300 mg	300,000 mcg — 2,000× RDA. Thyroid disruption.
B Vitamins		
SUPPLEMENT	DOSE	NOTES
B1 Benfotiamine	300 mg	Fat-soluble thiamine.
B2 Riboflavin	400 mg	Migraine-prevention dose.
B3 Niacinamide	500 mg	Non-flushing form.
B6 P5P	25 mg	Active form. ~35 mg total.
B12 Methylcobalamin	1,000 mcg	Active methylated form.
Vitamins & Antioxidants		
SUPPLEMENT	DOSE	NOTES
Raw Vitamin C	500 mg	~625 mg total from all sources.
Liposomal Glutathione	735 mg	Master antioxidant. Synergy with Vit C.
Lycopene	50 mg	Prostate support.
Omega Fatty Acids & Amino Acids		
SUPPLEMENT	DOSE	NOTES
Krill Oil	2,000 mg	EPA/DHA phospholipids + astaxanthin. Blood thinning.
L-Lysine	3,000 mg	Immune support, collagen.
Acetyl L-Carnitine	1,500 mg	Mitochondrial function. Lowers blood sugar.
Herbal Extracts		
SUPPLEMENT	DOSE	NOTES
Aged Garlic Extract	7,500 mg	Very high. Blood thinning + BP lowering.
Oil of Oregano	6,000 mg	Extremely high. Antimicrobial, GI-irritant, hepatotoxic.
Olive Leaf / Oleuropein	680 / 50 mg	BP-lowering. Redundant with BurnSlim.
Black Seed Oil	2,000 mg	Anti-inflammatory, anticoagulant, BP/BS-lowering.
Collinsonia Root	892 mg	Stone root — vascular support.
Saw Palmetto	450 mg	DHT blocker. In 3 products total.
Immune Support & Antimicrobials		
SUPPLEMENT	DOSE	NOTES
Black Elderberry 10:1	500 mg	Equiv. 5 g whole berry. Immune-modulating.
Echinacea	1,300 mg	Immune stimulant.
Antimicrobial Herbal Blend	2,070 mg	Knotweed, cat's claw, wormwood, skullcap, serrapeptase, piperine + 4 more.
Specialty Blends & Multivitamins		
SUPPLEMENT	DOSE	NOTES
Codeage Men's Multi	2 caps	Full multi: A, C, D3, E, B-complex, iron 27.5mg, zinc 7.5mg, CoQ10, K2, probiotics.
Spike Protein Tri Support	800 mg	Nattokinase 400mg + serrapeptase 100mg. Potent fibrinolytics + papain, curcumin, bromelain.
Turmeric + Propolis + Ginger	1,270 mg	Curcumin with piperine. Anti-inflammatory + antiplatelet.
Advanced Eye Formula	490 mg	Lutein, zeaxanthin, bilberry, astaxanthin.
Grassfed Beef Organs	3,000 mg	Liver, heart, kidney. Bioavailable B12, iron, CoQ10.
Hormonal & Prostate Support		
SUPPLEMENT	DOSE	NOTES
Atlas X Masculinity Blend	1,050 mg	Horny goat weed, fenugreek, citrulline, nettle, tongkat ali.
Pulse Male (NO Booster)	660 mg	L-Arginine 400mg + L-Citrulline 200mg + beta alanine.
Snap Prostate Health	2,000 mg	Saw palmetto, nettle, beta sitosterol, maitake, reishi, turmeric, EGCG, lycopene.
Weight & Blood Sugar Management		
SUPPLEMENT	DOSE	NOTES
BurnSlim Blend	800 mg	Berberine (metformin-equiv.), olive leaf, moringa, holy basil, cayenne.
Blood Sugar Support	~310 mg	Gymnema, bitter melon, banaba, cinnamon, ALA, LICORICE ROOT, guggul, chromium + 6 more.
Whole Foods & Digestive		
SUPPLEMENT	DOSE	NOTES
Organic Moringa	1,000 mg	Lowers blood sugar and BP. Also in BurnSlim.
Beetroot + MCT + Pepper	905 mg	Nitric oxide precursor + piperine source.
Pumpkin Seed / Broccoli / Kale	600/100/100	Zinc, phytosterols, sulforaphane, vitamin K1.
Fruit & Veg Blend / Probiotics	720 / 60 mg	Phytonutrients. Probiotics reduced by oregano oil.

For informational purposes only. Consult a qualified healthcare provider.

CRITICAL — Requires Immediate Medical Review

- 1. Extreme Bleeding Risk: 8+ Anticoagulant Mechanisms**

Ibuprofen · Aged Garlic · Nattokinase · Serrapeptase (×2) · Bromelain · Krill Oil · Curcumin (×3) · Black Seed Oil · Resveratrol

NSAIDs inhibit platelets. Nattokinase/serrapeptase dissolve clots. Garlic, curcumin, omega-3s add antiplatelet effects. 8+ blood-thinning mechanisms — very high GI hemorrhage and uncontrolled bleeding risk.

Stop combining NSAIDs with fibrinolytics and multiple blood thinners. MD review before any surgery.
- 2. Vitamin D3 at 100,000 IU/day — Hypercalcemia**

25× typical therapeutic weekly bolus. Causes dangerously high calcium — kidney stones, arterial calcification, arrhythmias. K2 helps but cannot compensate at this level.

Require serum 25(OH)D and calcium. Only for documented severe deficiency under supervision.
- 3. Iodine at 300 mg (300,000 mcg) — Thyroid Crisis**

2,000× RDA, 273× upper limit. Risk of thyroid storm, Wolff-Chaikoff hypothyroidism, or Jod-Basedow hyperthyroidism.

Requires endocrinologist. Regular TSH, free T3/T4 monitoring.
- 4. Licorice Root Counteracts Potassium & BP Stack**

Licorice raises BP, wastes potassium, causes fluid retention — directly opposes 9 BP-lowering agents and potassium supplement. Unpredictable electrolyte swings affect heart rhythm.

Remove licorice root or replace the blood sugar formula.
- 5. Extreme Blood Sugar-Lowering Stack**

Berberine · Gymnema · Bitter Melon · Banaba · Cinnamon · ALA · White Mulberry · Moringa · Black Seed Oil · Chromium · ALCAR

Berberine alone matches metformin. Adding 10 more glucose-lowering agents creates severe hypoglycemia risk when fasting or exercising.

If not diabetic, potentially dangerous. Requires regular glucose monitoring.

HIGH RISK — Monitor Closely

- 6. Zinc 126mg from 4 Sources (3× Upper Limit)**

Zinc:copper ratio 35:1 vs ideal 10–15:1. Chronic high zinc → copper deficiency anemia, neurological damage.
- 7. NSAIDs + Oregano 6,000mg + Garlic: GI Ulceration**

Oregano is caustic to GI lining. Combined with NSAIDs and garlic, ulcer/GI bleed risk dramatically elevated.
- 8. 9+ Blood Pressure-Lowering Agents**

Magnesium, potassium, olive leaf, beetroot, garlic, moringa, black seed oil, citrulline, arginine. Hypotension risk. Licorice counteracts unpredictably.
- 9. Piperine (4 Products) Amplifies Entire Stack**

Inhibits CYP3A4 — increases bioavailability of ibuprofen, berberine, curcumin and everything else by 30–2,000%.
- 10. Wormwood + Oregano + NSAIDs: Liver Toxicity**

Three hepatotoxic agents daily. Artemisinin (wormwood) unsafe for prolonged use. Combined liver stress.
- 11. Duplicate Fibrinolytics: Serrapeptase (×2) + Nattokinase**

~470,000 SPU serrapeptase + 12,000 FU nattokinase. Potent clot-dissolving cocktail on top of NSAIDs/garlic/curcumin.
- 12. Saw Palmetto + Nettle (3 Products): DHT Stacking**

Functions like prescription finasteride. Sexual side effects, mood changes, breast tenderness possible.
- 13. Hormonal Support from 5+ Products**

Atlas X, Pulse Male, Snap Prostate, boron, fenugreek (×2), tongkat ali, nettle (×2). Unpredictable hormonal effects.
- 14. Immune Overload: 10+ Stimulants + Antimicrobials**

Elderberry, echinacea, cat's claw, oregano, garlic, black seed oil, wormwood, cryptolepis. Autoimmune flare risk. Gut flora devastation.
- 15. Boron 26.2mg (Above UL of 20mg)**

GI distress and reproductive toxicity at chronic high doses.

Recommended Lab Monitoring	
Blood/Clotting: CBC, PT/INR. Watch for bruising, dark stools.	Calcium/D3: Serum 25(OH)D, calcium, PTH.
Thyroid: TSH, free T3/T4. Watch for heart rate changes.	Zinc/Copper: Serum zinc, copper, ceruloplasmin.
Blood Sugar: Fasting glucose, HbA1c.	Liver: ALT, AST, GGT. Watch for dark urine, jaundice.
Blood Pressure: Regular home monitoring.	Hormones: Total/free testosterone, DHT, estradiol.
Kidney: BUN, creatinine, eGFR.	Electrolytes: Potassium, sodium, magnesium.
